

IN THE ABSTRACT OF THE DISCLOSURE

Please replace the existing Abstract of the Disclosure with the following:

A method of communication between a calling party in a first network and a called party in a second network is disclosed. The method comprises determining in the first network an address associated with the called party. The method also comprises determining, based on the address, if the called party is in a trusted network, and controlling the communication between the called party and the calling party in dependence on if the called party is in a trusted network.
